

To our patients and families:

We have continued to closely monitor the rapidly changing developments of COVID-19. This week, the CDC, state and local governments have provided additional guidance and directives regarding the continued changing circumstances. We have made the decision to continue the closure of all of our outpatient locations through April 11th. As of today, we will re-open April 13th.

Our Contract Services (EI/School Services) closures are dependent on each district and county.

We will continue to communicate regularly through email, our Facebook page and website. We expect that when we re-open our centers, we will provide options for extended and additional patient care hours.

We are currently working on teletherapy services and opportunities for our patients and students although this method of therapy is not covered by all insurances/agencies. We anticipate that teletherapy will provide opportunities for us to continue the delivery of therapies to your child.

If interested in teletherapy [click here](#).

We are beyond grateful for your trust and we look forward to filling our centers again with the joys and accomplishments of your children through therapy.

Sincerely,

Positive Steps Therapy
