

Parents and caregivers,

We are excited that all Positive Steps Therapy outpatient offices are now open and seeing patients! We are also continuing to provide teletherapy for patients who are unable or not yet comfortable returning to in-person sessions at this time.

If you are interested in returning to services, please contact the office where you would like to return:

Butler: 724-486-3077 • Gibsonia: 724-444-5333 • McCandless: 412-366-3653
Moon: 412-742-0964 • Upper St. Clair: 412-595-8498
Washington: 724-705-7050 • Wexford/POI: 724-933-6677

Our offices will have limited hours and we ask that you leave a message if one of our staff members is not available to help you. You can also email kids@positivestepstherapy.com to inquire about an office location and we will have the front desk coordinator from that location contact you.

On the following page you can find updated information on travel restrictions. Please review, and contact your center if you have any questions.

To protect our patients, their families and employees, we have put in place safety measures that follow the CDC guidelines. [Please click here to read our Letter to Families](#). You can also ask the office to share these with you, so that you are prepared for your visit.

We look forward to seeing you soon!

Due to the recent increase in the number of cases in certain areas, some states are placing restrictions on travel to designated areas of increased risk. In order to prevent the spread of COVID-19 and ensure the safety of our employees, patients and their families, the Theraplay Family of Companies will require patients and their families, as well as employees, to observe state orders.

All patients and their families who will be traveling to another state should reach out to their center to discuss any restrictions that may apply. Please be advised that your ability to return to sessions might be limited due to changes in state regulations during or after your trip. Information about travel advisory by the CDC can be found [here](#).

If you have traveled, or plan to travel, to an area where there are high amounts of COVID-19 cases, it is recommended that you stay at home for 14 days upon return to Pennsylvania. If you travel to the following states, you will need to quarantine for 14 days upon return:

- Alabama
- Alaska
- Arkansas
- Colorado
- Connecticut
- Georgia
- Florida
- Illinois
- Idaho
- Iowa
- Indiana
- Kansas
- Kentucky
- Massachusetts
- Michigan
- Minnesota
- Mississippi
- Missouri
- Montana
- Nebraska
- Nevada
- New Mexico
- North Carolina
- North Dakota
- Oklahoma
- Rhode Island

- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Virginia
- Wisconsin
- Wyoming

In addition to the states in which it is recommended that people stay at home for 14 days upon return to Pennsylvania, and recommended that individuals from these states do not travel to Pennsylvania, we also have several neighboring states that meet the travel advisory criteria. Those states are:

- Delaware
- Maryland
- New Jersey
- Ohio
- West Virginia

Given the interconnected nature of Pennsylvania to neighboring states and the region and mode of transport between these states, a recommendation of quarantine for these states is not practically viable. That said, the department highly discourages, to the extent practical, non-essential travel to and from these states while they meet the travel advisory criteria.

It is also important to remember that COVID Alert PA works in Pennsylvania and a number of other states, including Delaware, Nevada, New Jersey, New York, North Carolina, North Dakota, Washington D.C., Wyoming, and some parts of California.

Additional information can be found [here](#). It is important to note that everyone should be practicing infection prevention measures. Thank you for your help in keeping our PST family safe!
